

I want to respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I now enjoy. My family (and friends) benefit from listening to XM Satellite Radio and its traffic and weather channels. XM satellite radio provides variety and quality that are not available elsewhere. When I am driving to other cities, I want to be able to know what traffic and weather conditions to expect. XM's programming has changed our commute - and our travels - we now enjoy driving. (Children love the programming designed for them, we listened to all the world series games, and we love listening to more content and less commercials) - The list goes on. Please REJECT PETITION 04-160.
